

Natural Dehydrated Ingredients

The Best of Nature
Tailored for You

An Essential Requirement for Dynamic Markets

Natural dehydrated ingredients must be tailored to a broad and diverse range of industry demands. High standards are driving the need for reliable and controlled ingredients, and meeting and anticipating new industry trends requires flexibility, innovation, and continual development.

Name your ingredient and benefit from our expertise

SDA specializes in the development and production of natural dehydrated ingredients at the highest level of quality required by the most demanding industries.

No matter the industry, whether you need a tailor-made solution, an ingredient to enhance an existing product or that will open doors to new possibilities, we have the vital experience and expertise.

Tailor-made: Get exactly what you need, when you need it, not dependent on existing shelf products. Discover new ingredients; enter new markets with unique products and opportunities.

Competitive products: Gain a competitive edge with high-quality natural dehydrated ingredients that make a difference.

Uncompromising quality: You get the highest quality product, manufactured under full-cycle supervision in a controlled environment from seed to storage, with 100% traceability.

Stable supply and delivery: You'll always have a steady supply of ingredients for your products and a stable inventory for your customers because we always deliver, year round, no matter the quantity.

SDA: Your natural partner

SDA is directly responsible for the entire product cycle, employing strategic management and supervision, maintaining full end-to-end control of the work process. Hands-on involvement from soil preparation, through sowing, growing, harvesting, and the process of cleaning, dehydrating and sieving, ensures a synchronized and reliable process that produces standardized, consistent high-quality natural dehydrated ingredients with unique freshness, aroma, and flavor.

SDA's methodologies, expertise, and investment in R&D make us uniquely qualified, combining nature, technology, and innovation to offer our customers creative solutions and the ability to support new initiatives.

Optimal growing conditions: Our products are grown under optimal climatic conditions. Fields in diverse climates in the north and south of Israel enable us to meet any seasonal-related demand, including a range of sowing and harvesting times. Top-quality selected seeds and advanced growing methods are backed by SDA's expert agronomists, who supervise and control the growing process from the field.

Select harvesting and processing: SDA's processes ensure minimum turnaround from harvesting to processing. An advanced system enables diverse sifting and separation processes, and protects crops from damage.

Dehydration process: A controlled, mechanical process maintains product quality, protecting dehydrated ingredients from damage with state-of-the-art air-drying equipment to ensure optimal temperature control.

Optimal storage conditions: Finished products are kept in optimal climate-controlled conditions. Cold storage ensures a clean environment and preserves field freshness, color, stability, and aroma.

Advanced technologies: SDA maintains strict standards for field quality and land treatment, employing advanced irrigation systems, modern harvesting machinery, and incorporating organic farming methods and non-pesticide management. Our production process employs a fully computerized and automated packing process.

From seed to ship to new endeavors: We've got you covered

Established in 1987 in Kibbutz Sde Eliyahu, located in the Beit Shean valley, SDA is a pioneer of organic agriculture in Israel. Our customers include manufacturers, distributors, and dealers in a wide range of industries, who depend on SDA's reliable products, solutions, and ability to adapt to changing and challenging needs, as an integral component of their end-products.

Research and development: Israel has one of the highest levels of agricultural production in the world, proudly earning its name as a leader in agri-tech and food-tech. SDA has close ties with leading agricultural research institutes in Israel; the Agricultural Research Organization (ARO)-Volcani Center, and the Hebrew University Faculty of Agriculture, Food, and Environment. We continuously invest in R&D to maintain the highest standards, adhere to principles of sustainable agriculture, and pioneer innovative and diverse products.

As a key provider of natural dehydrated ingredients around the world, SDA is committed to compliance with international standards, while embracing core values of innovation, excellence, sustainability, and customer satisfaction.

Quality control and assurance

SDA's laboratories are equipped with state-of-the-art technology for in-house testing; all products are tested at all stages of production. A 24-month archive facilitates tracking of every production batch.

All SDA products meet the strictest standards to ensure the safety of raw materials in the food chain, in compliance with international standards for food safety and authorized for ISO-9001 and ISO 22000. Growing fields are under the certification of EuroGap. Organic plants and growers are certified to European organic standards, NOP and Israeli organic standards. Certification is by Agror Ltd, under accreditations of USDA, IFOAM-IOAS, and Israeli PPIS. Cold storage preserves the products' long-lasting qualities, and cardboard boxes with inner poly-propylene bags maintain freshness and quality.
